 - Company - Reino Technology private limited - 6 months
 - Responsibility
 - Maintenance of web servers of almost 30 clients
 - Deployment of server and clients developed in JAVA FX , SERVLETs, TOMCAT , PGSQL , APACHE , RABBIT MQ SERVER .
 - Template designing using XML for custom bill formats
 - Trained 25 clients about product configuration, usage of complete application.
 - Analyze and report bug to the developer and fix bugs with new deployment of app
 - Creating procedure, views, triggers for PGSQL to fetch data as per client requirements, maintaining updated backup of database, porting application to new versions.
 - Enhance good relationship with customer and ensure customer satisfaction.
 - Worked as part of development team In Mobile Android Development
 - Role : UI/UX Developer.
 - Technology : Android, Firebase, Github, Java ,MVC Design Pattern, Material Design, Gradle, XML, Google SDK, API, Sketch.

- F&B SERVICE INDUSTRY
 - KFC 1.5 yrs.
 - Dominos 1.8 yrs.

TECHNICAL SKILLS

- **Front-end Technologies:**
 - HTML
 - Bootstrap
 - JAVASCRIPT
 - W3CSS
 - Typescript
 - Material Design
 - CSS/SCSS
 - Adobe Illustrator
 - Adobe Photoshop
 - Wireframe.cc
- **MEAN Stack:**
 - Angular
 - Express
 - Node JS
 - Mongo DB
 - Firebase
 - MySQL
- **Mobile Technologies**
 - Android
 - Firebase
 - SQL lite
 - Material Design
- **Other Technologies:**
 - WAMP, LAMP.
 - JAVA, J2EE
 - PHP
- **Foundation Paradigms:**
 - Object Oriented Programming (OOPS)
 - XML
 - JSON
 - AJAX
 - Document Object Model (DOM)

- **Development environment and tools:**
 - Development platform: Ubuntu, Windows
 - Editor: Bracket, VSCODE, ECLIPSE, PHPSTROM, ANDRIOD STUDIO.
 - Webserver and packages: Apache Tomcat server, NPM, NGIX, WEBPACK
 - Version control: GIT.
 - Debuggers: Chrome Debugger, VSCODE Debugger.

EDUCATION

- B..C.A Bangalore University, 66%, 2014-2017
- Class – XII, PUC, 78%, 2014
- Class – X, KSEEB, 56%, 2012

CERTIFICATIONS

- CSEC HDCAP (Honors Diploma in computer application programming) Bangalore
- Currently undergoing masters in full stack web development course at webstack academy (<http://www.webstackacademy.com>), Bangalore.

PERSONAL INTERESTES

- Riding, Racing
- Editing
- Travelling
- Swimming
- PUBG
- Thrill Seeker

PROJECTS

Project Number:1	
Title	Todo APP http://divek.rf.gd/js Username: divek Password: john
Project brief	Create To Do List using Local storage and perform basic operations like read write update and delete.
Technologies used	HTML5, CSS3 JS, w3css
My role	Developer
Key challenges and learnings	<ul style="list-style-type: none"> ▪ Making the page responsive by scaling it across various browser resolutions. Testing in mobile phone exposed additional issues which were resolved by understanding the grid system better. ▪ Coming up with various pages and flows was one of the challenges faced during implementation. It was resolved by coming up with a high level site-map and creating UX flows. ▪ Js local storage understanding

Project Number:2	
Title	Todo APP using Angular 6 and Firebase http://divekjohns.firebaseio.com Username: divek Password: 1234
Project brief	SPA Application Using Angular And Backend as firebase and perform CRUD Operation And Deploying On Firebase Server
Technologies used	Angular 6 , Firebase, HTML5, CSS3
My role	Developer
Key challenges and learnings	<ul style="list-style-type: none"> • Making the page responsive by scaling it across various browser resolutions. Testing in mobile phone exposed additional issues which was resolved by understanding the grid system better. • Coming up with various pages and flows was one of the challenges faced during implementation. It was resolved by coming up with a high level site-map and creating UX flows. • MVC Based Software Architecture Understanding and Implementation

Project Number :3	
Title	E-commerce(ongoing) http://ecart.divek.rf.gd
Project brief	Angular base full stack app to perform all ecommerce operations
Technologies used	HTML5, CSS3, Java Script, Angular, node JS, firebase, MongoDB, Express
My role	Developer
Key challenges and learning	<ul style="list-style-type: none"> • Complete understanding of an mean stack app • Architecture of an web application • Prototyping of complete frontend • Testing and debugging • Local storage and session storage importance • Single page application flow • Routing and authentication • Deployment in heroku • Connecting and querying from mongoose library from mongodb • Webpack server importance

Project Number:4	
Title	Whack a Penguin http://divek.rf.gd/js/whackapenguin/ Username: divek Password: john
Project brief	Whack a penguin is an simple Js based Quick flash type game with 9 penguin images Displayed randomly and when the penguin yeti hits the screen the game is done

Technologies used	HTML5, CSS3, Java Script
My role	Developer
Key challenges and learning	The method of choosing to reduce the objects by maintaining heaps for the players was a challenge, which was solved by using single heap for the players making it easy, efficient with less lines of code.

Project Number:5	
Title	My Portfolio http://divek.rf.gd
Project brief	An introduction about me.
Technologies used	HTML5, CSS3, JavaScript JQuery libraries
My role	Developer
Key challenges and learning	<ul style="list-style-type: none"> • Usage of JQuery and plugins • HTML/DOM manipulation • CSS manipulation • HTML event methods • Effects and animations • AJAX

Project Number:6	
Title	Message PORT http://safemessage.divek.rf.gd
Project brief	PHP to transfer messages safely
Technologies used	HTML5, CSS3, JavaScript, PHP,MySQL
My role	Developer
Key challenges and learning	<ul style="list-style-type: none"> • Usage of PHP Stack • Firewall ,Permissions in Apache tomcat Server • PDO Queries to MySQL • POST/GET Methods • Sharing messages from chrome to other apps • Responsive ,Browser Compatibility • AJAX Request and response after html form submission
